Build Expert Trading Strategy 9:30 am in Forex with 5m timeframe

14 June 2024 at 02:26

MQL4

Experts

Specification

Build Expert Trading Strategy 930 am in Forex:

Build Expert Trade to implement the 9:30 am strategy in the Forex market. I'll explain the programming steps.

steps:

Choose currency pair and time: (Adjustable option within the Expert and prefer to put 10 options for couples and also place the timeframe selection from 5 Mints to 4 hours).

Determine the market trend:

§ Once the next candle is closed (after 5 minutes),

§ The expert compares the lowest and highest price values in the current candle with the values in the previous candle.

§ If the closing price is higher in the current candle than the highest price after the closing in the previous candle,

§ The market is in an upward trend.

In a bear market:

Determine the market trend:

§ Once the next candle is closed (after 5 minutes),

§ The expert compares the lowest and highest price values in the current candle with the values in the previous candle.

§ If the closing price is higher in the current candle than the highest price after the closing in the previous candle,

§ The market is in an upward trend.

In a bear market:

§ On the contrary, if the closing low of the current candle is lower than the low of the previous candle,

§ Market market in the direction of a trend.

§ On the contrary, if the closing low of the current candle is lower than the low of the previous candle,

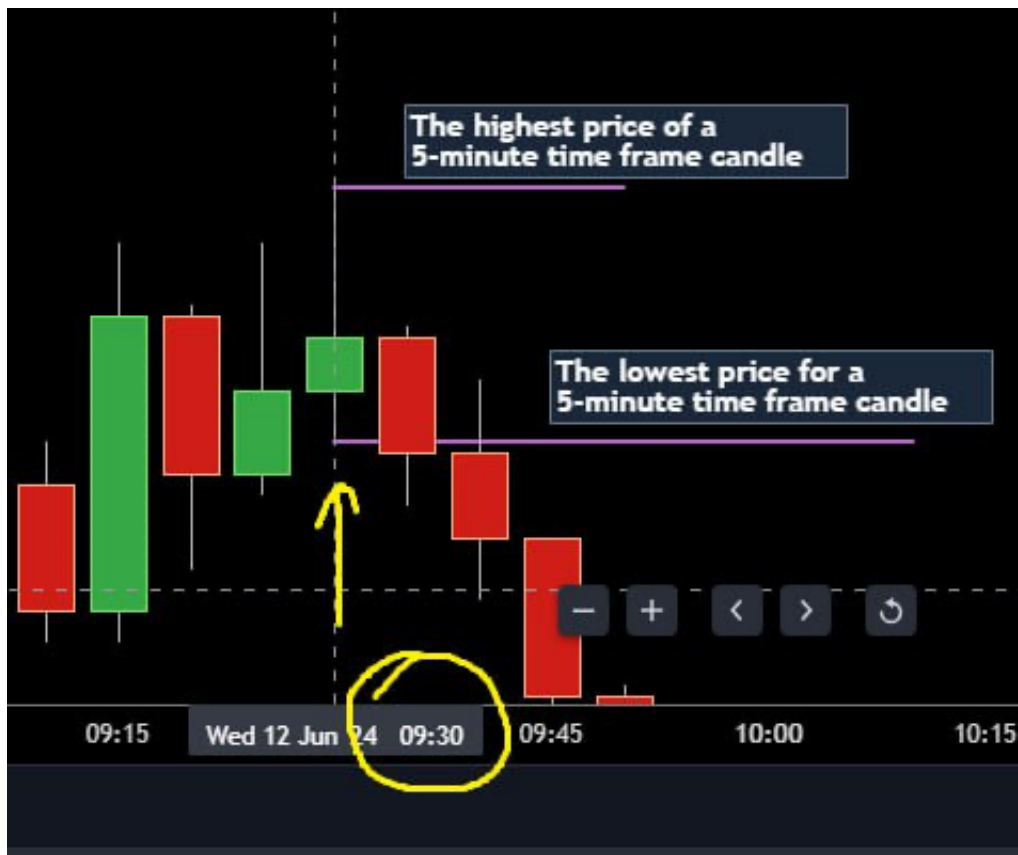

§ Market market in the direction of a trend.

- Here's an example - for the 5-minute timeframe, the 9:30 a.m. strategy set the closing time for the candle as standard.
- Therefore, expert settings should be adjusted to use the same time (e.g., GMT + 3). (adjustable option).

Market Data Analysis:

At the beginning of each new candle (at 9:30 am depending on the specified trading time),

The Express will collect the lowest and highest price during that candle.

Determine the market trend:

- § Once the next candle is closed (after 5 minutes),
- § The expert compares the lowest and highest price values in the current candle with the values in the previous candle.
- § If the closing price is higher in the current candle than the highest price after the closing in the previous candle,
- § The market is in an upward trend.

In a bear market:

- § On the contrary, if the closing low of the current candle is lower than the low of the previous candle,
- § Market market in the direction of a trend.

Requirements Specification Here is an example of Requirements Specification for the development of the MACD Sample Expert Advisor, which is available in the MetaTrader 5 standard package. 1. The idea of the trading system is as follows : market entries are performed when MACD's main and signal lines intersect in the current trend direction . 2. Trend is determined based on the Exponential Moving Average with

REWARD!

35 - 200 USD

I will pay you a REWARD, if you find / create an EA that fits ALL the below criteria! Platform : MT4 ONLY! NOT MT5, I repeat: NOT MT5!! Timeframe : doesn't matter Pair : doesn't matter Strategy : doesn't matter Drawdown : no more than 25% Return : minimum 5%, every month Lot sizing : dynamic lots I will backtest the EA with 99.9% tick data accuracy for a period of 20+ years . If the EA can produce minimum 5% returns

NEED A READY MADE GOLD SCALPING EA

30 - 200 USD

Hello, I am looking for an existing MT5 EA for XAUUSD (Gold). I do not want a custom EA from scratch. I need a high-frequency breakout scalping EA with: Buy Stop & Sell Stop (OCO) Fixed Stop Loss Automatic Break-even Tick-by-tick Trailing Stop One trade at a time If you already have such an EA, please send live results, demo, pricing, and videos

KOKIE FX

EA and Signal Configuration, Monitoring and Reporting Service needed

30 - 200 USD

Hello, I am looking for someone to Run and Monitor the EA and Signals in the account. Should be able to monitor daily and fix any issue in the signal Copying and EA running. The Settings and configuration to be checked and updated periodically. Should be available to report and update on daily basis. Tell me the cost and your previous experience for the same. Thanks

Elite sniper scalper

30+ USD

```
void OnTick() { // Check if we already have an open trade if(OrdersTotal() == 0) { // Get the value of a  
14-period Moving Average double ma = iMA(Symbol(), 0, 14, 0, MODE_SMA, PRICE_CLOSE, 0); // Basic  
Condition: If current close price moves above the MA, buy if(Close[0] > ma) { int ticket =  
OrderSend(Symbol(), OP_BUY, 0.1, Ask, 3, 0, 0, "My First Bot", 0, 0, clrGreen); } }
```

Profit Hunter Killer EA

100+ USD

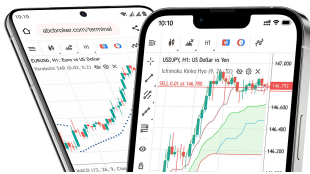

i brought an EA called profit hunter killer and the file is not working any more its a scalper type EA can anyone here decompile the file as i can not be to reach the seller i brought it on Shopee malaysian website

Strangest request, EVER!

30 - 250 USD

Recently I have backtested more than 100 EAs and I have come to a conclusion that in the long-term all of them produce catastrophic results. I used 99.9% data quality and whenever possible decades of data. In the short-term almost all of them can have nice gains. But there is hardly any EA that could survive even just 3-5 years, let alone decades ! This got me thinking: if almost all EAs are unfit for long-term
