Order Flow Volume Profile Indicator And Drawing Tool

Analyze the distribution of trading volume over price for a specified time range to identify significant levels of support and resistance with this comprehensive visual display.

- Multiple visualization modes
- Plot volume, delta, ticks or price
- Display point of control and value areas

Volumetric Bars

Volumetric bars track buyers and sellers tick by tick, giving you a comprehensive view of the activity for order flow trading.

- Footprint style visualization
- Show order flow imbalance
- Market delta analysis
- Identify volume clusters, absorption, exhaustion, and unfinished auction patterns

Order Flow VWAP

Identify key price thresholds and measure momentum with volume-weighted average price (VWAP), a moving average that also incorporates volume data.

- Deviation bands indicate price levels where buying and selling pressure are anticipated
- Confirm trends and track price breakouts

Order Flow Cumulative Delta

Track buying and selling with Cumulative Delta, a visual display of the net difference between buyers and sellers at each price level traded.

- Confirm or deny trends and gauge market strength
- Monitor buying vs. selling pressure to spot market reversals

Order Flow Trade Detector

Analyze the tape and visualize significant trade events on your chart. This is a powerful combination when used in conjunction with the Order Flow Market Depth Map.

- Tracks trades based on buyer or seller activity
- Display based on trade size or accumulation

Order Flow Market Depth Map

Historic and real-time visualization of the limit order book giving you clear insight of market depth and order flow.
