TRADING INTERFACE

Sign In →

## 1 Trading Panel

---

## Advanced Chart Trader

Easily manage your orders directly from the ATAS interface:

Place limit buy and sell orders with one click;

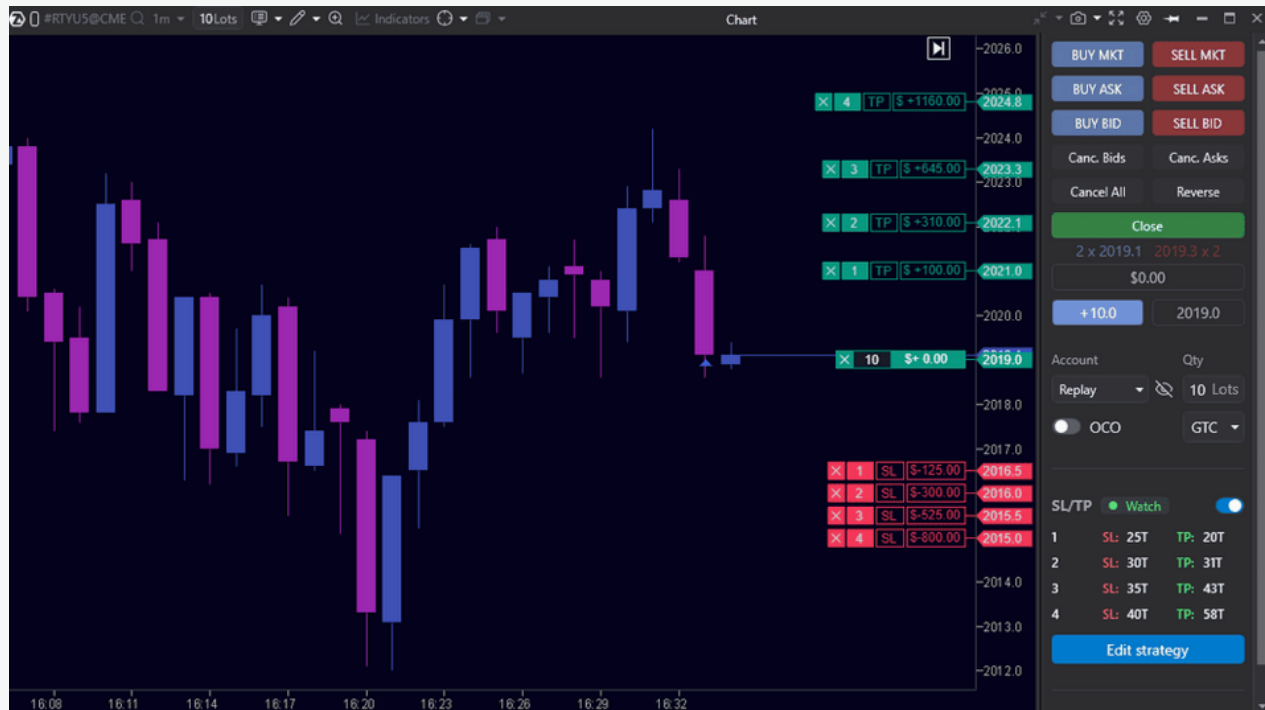

Close and reverse positions without delay;

Cancel irrelevant orders;

Set currency pairs, leverage, and margin mode for crypto instruments.

## 2 Order Management Directly from the Chart

## Easy Order Placement and Management

Easily and independently manage your orders directly from the ATAS chart:  
Place limit buy and sell orders with one click at the desired point on the chart;  
Quickly modify existing orders by dragging them to new price levels.

### 3 Order Management from the DOM

## Powerful Tools for Scalping and More

Smart DOM and DOM Trader synchronize with your self-connected exchange account, giving you complete control over orders:

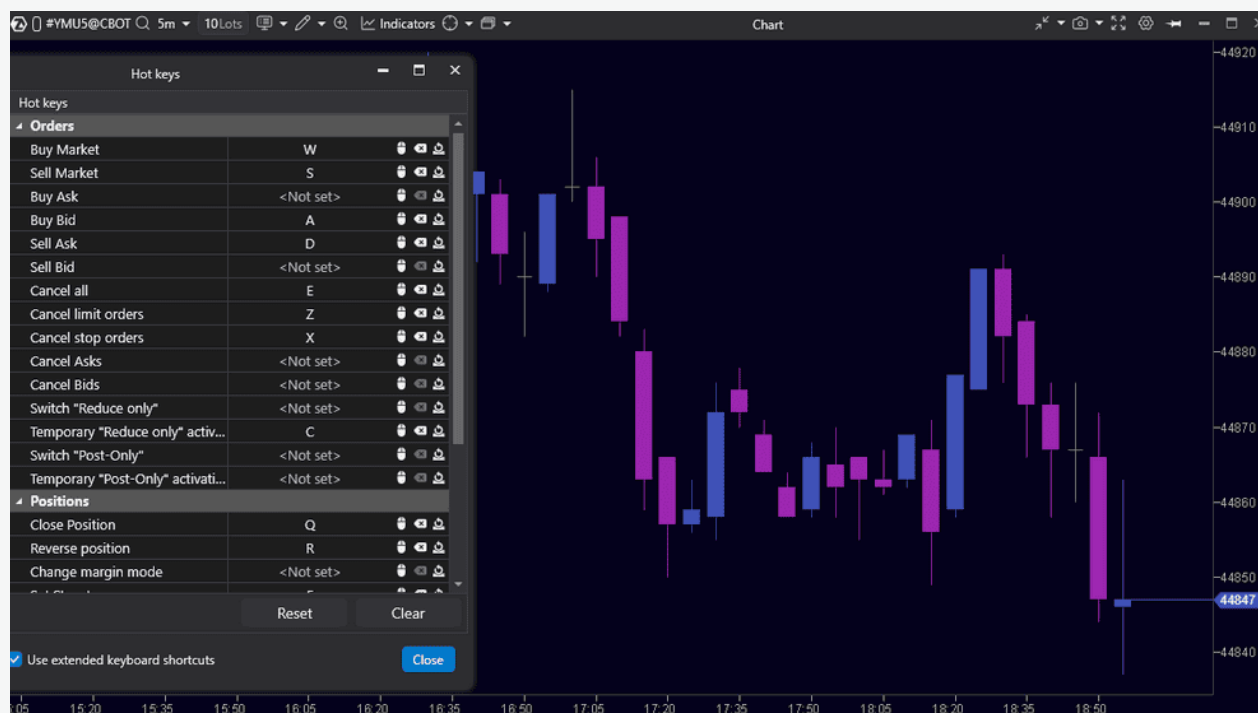

Self-send, move, and cancel orders in one click;

Change volume and rollover positions;

Set up automatic protection strategies to control risks.

### 4 Hotkeys

## Quick Commands

Customize your keyboard shortcuts for instant order management directly from the chart or via SmartDOM:

You can place buy and sell orders, bids, or asks with a single click;

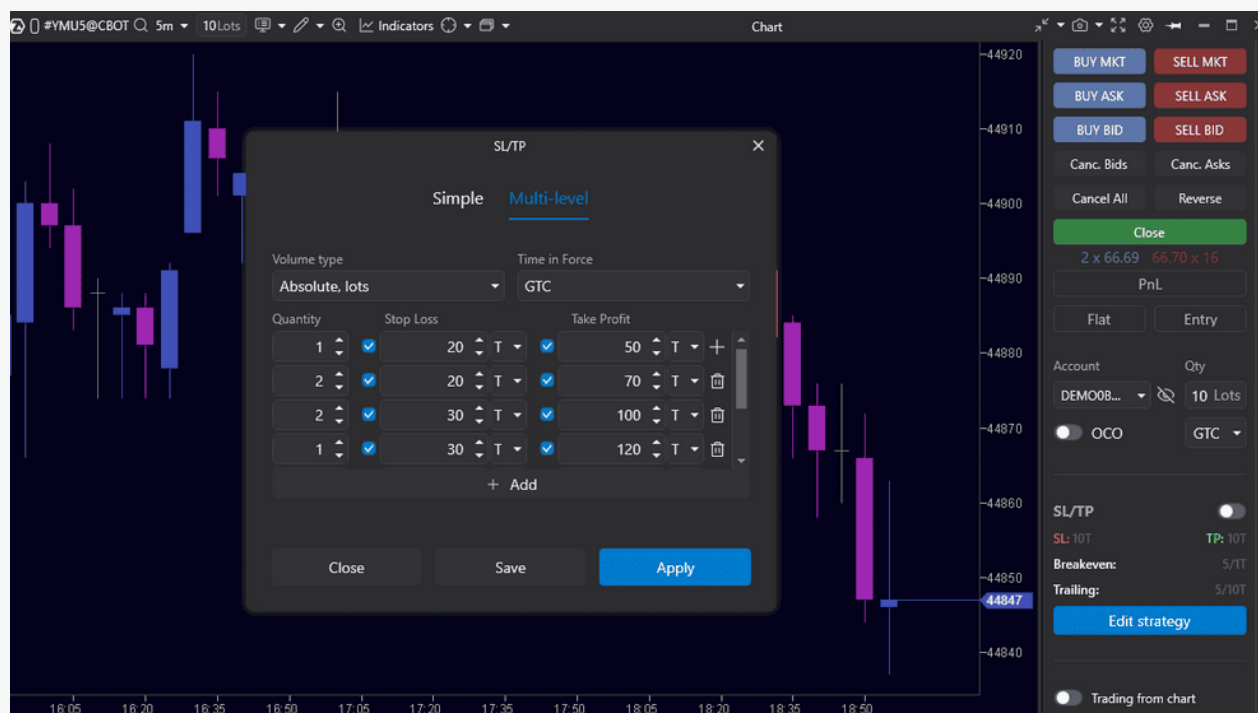

Instantly cancel your active orders;

Reverse and close your positions;

Set Stop-Loss/Take-Profit.

## 5 Risk Management

## Automatic Risk Management

ATAS provides tools for precise risk control and independent position management. Define acceptable scenarios in advance, minimize the impact of errors, and maintain discipline as market conditions change.

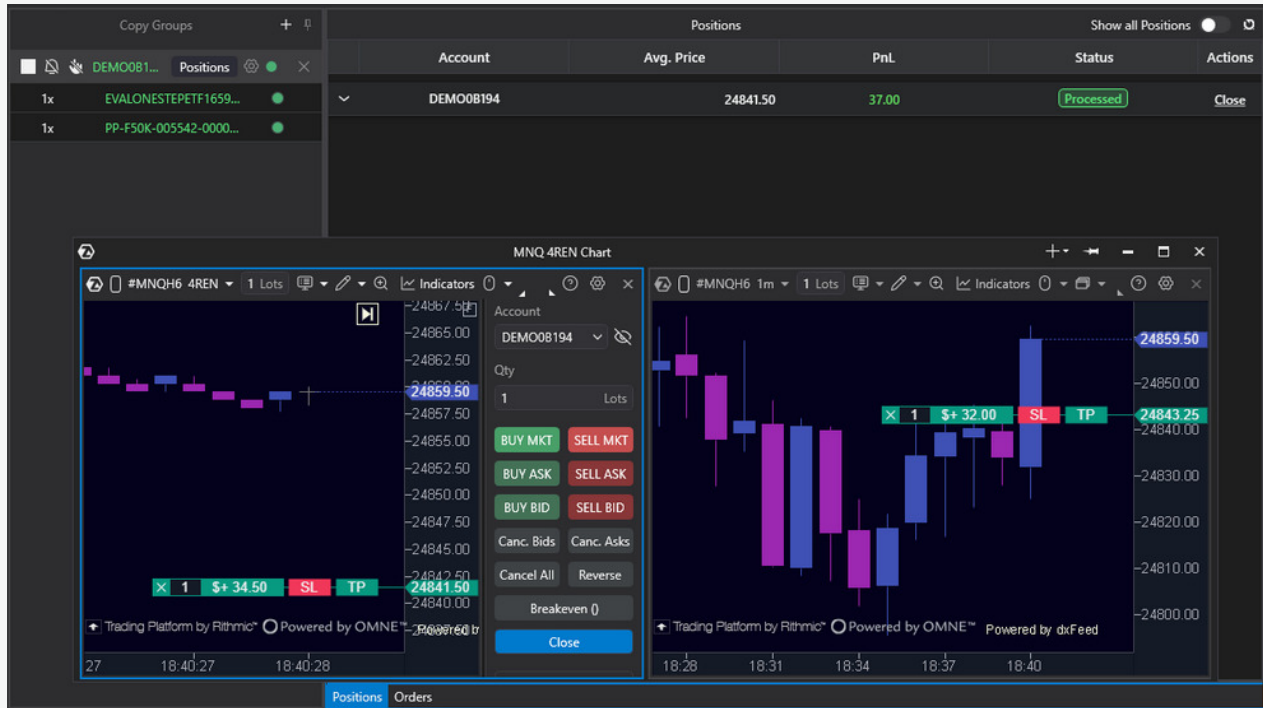

Flexibly configure Stop Loss, Take Profit, Breakeven, and Trailing Stop

Set and adjust stop losses and take profits directly on the chart using the position marker

Automatically cancel pending orders when closing or reversing a position

## 6 Following Manager

## Unified Account Management Center

Work independently with multiple connected accounts at once:

Set up copy groups with one provider account and multiple follower accounts — copy your actions to follower accounts automatically or manually;

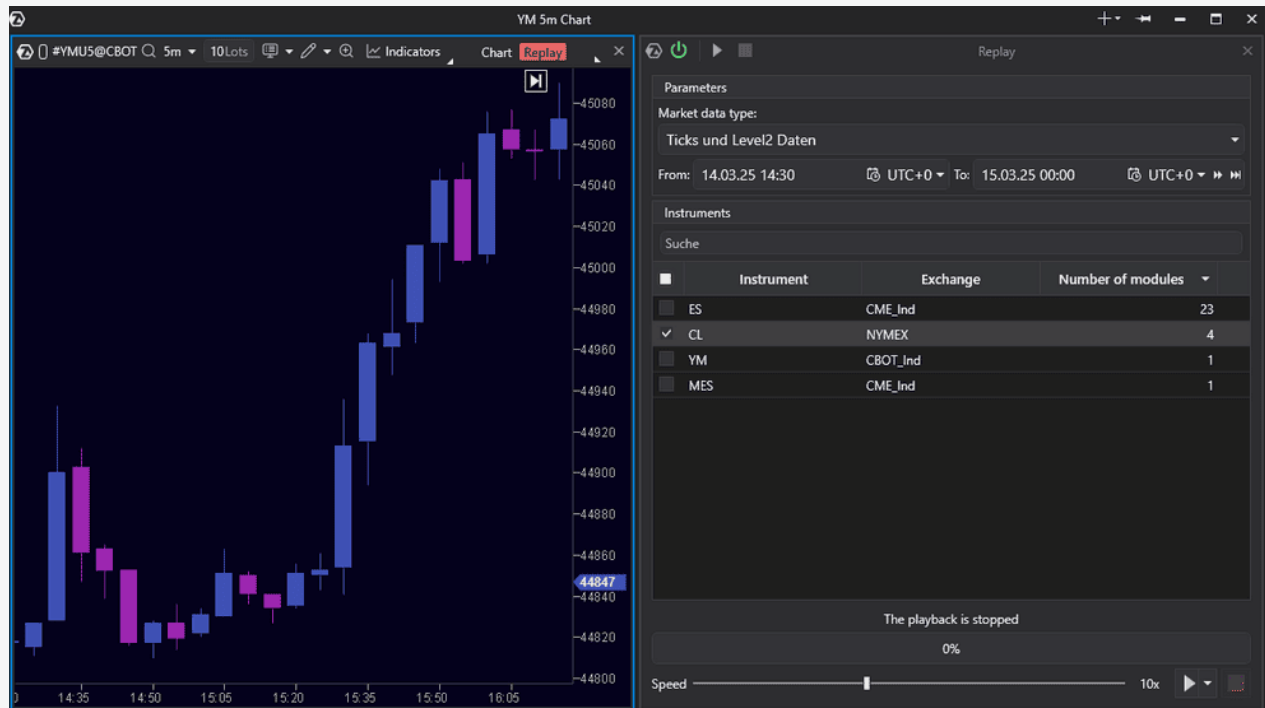

Synchronize operations with positions or orders across accounts;

Monitor status and analyze results across all accounts in a single interface.

## 7 Market Replay

## History Emulator

Market Replay is a simulator that recreates trading activity from historical order book data, including Level II, offering the same capabilities as our software provides for real-time analysis. Learn trading and test strategies without risking real capital.

Select up to 20 instruments for simultaneous playback;

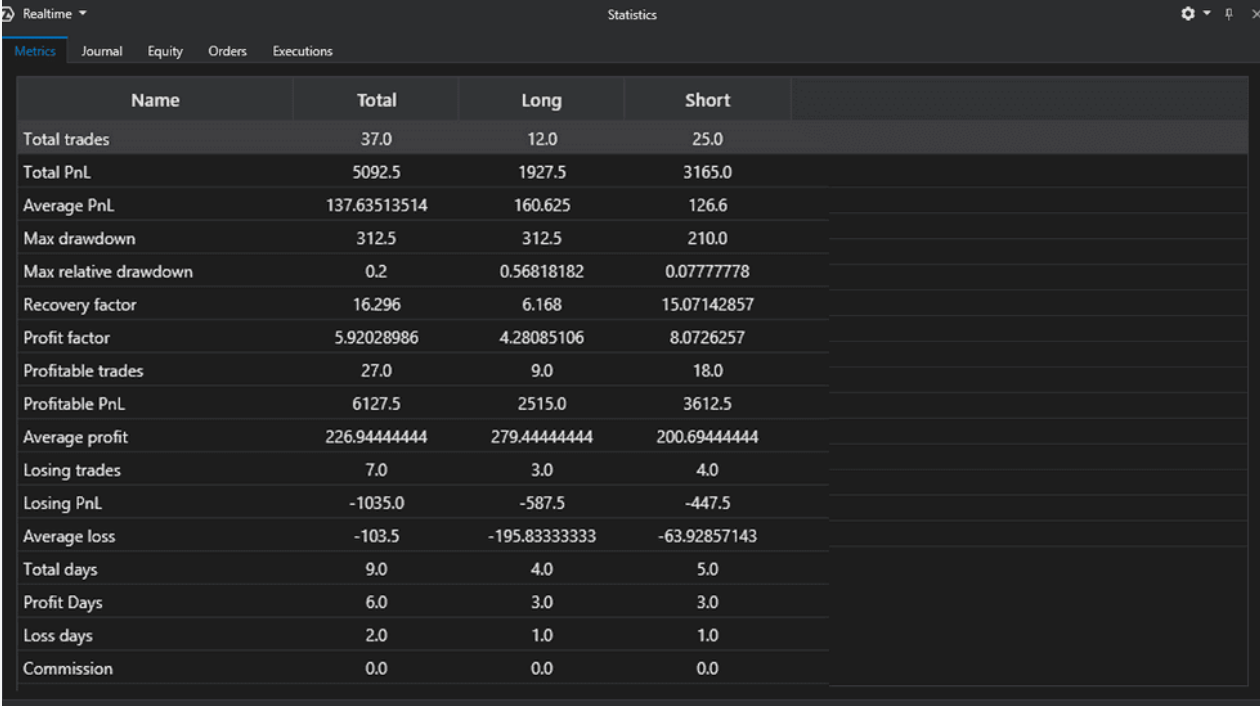

Use cluster charts, custom time frames, any indicators, and modules;

Analyze historical trades with data going back up to one week;

Adjust playback speed from 1x to 1000x to save time.

## 8 Statistics Module

## Trade & Order History

The screenshot shows the 'Statistics' tab in a trading application. The interface has a dark theme with a top navigation bar containing 'Realtime', 'Journal', 'Equity', 'Orders', and 'Executions'. The 'Statistics' tab is active, displaying a table with the following data:

| Name                  | Total        | Long          | Short        |
|-----------------------|--------------|---------------|--------------|
| Total trades          | 37.0         | 12.0          | 25.0         |
| Total PnL             | 5092.5       | 1927.5        | 3165.0       |
| Average PnL           | 137.63513514 | 160.625       | 126.6        |
| Max drawdown          | 312.5        | 312.5         | 210.0        |
| Max relative drawdown | 0.2          | 0.56818182    | 0.07777778   |
| Recovery factor       | 16.296       | 6.168         | 15.07142857  |
| Profit factor         | 5.92028986   | 4.28085106    | 8.0726257    |
| Profitable trades     | 27.0         | 9.0           | 18.0         |
| Profitable PnL        | 6127.5       | 2515.0        | 3612.5       |
| Average profit        | 226.94444444 | 279.44444444  | 200.69444444 |
| Losing trades         | 7.0          | 3.0           | 4.0          |
| Losing PnL            | -1035.0      | -587.5        | -447.5       |
| Average loss          | -103.5       | -195.83333333 | -63.92857143 |
| Total days            | 9.0          | 4.0           | 5.0          |
| Profit Days           | 6.0          | 3.0           | 3.0          |
| Loss days             | 2.0          | 1.0           | 1.0          |
| Commission            | 0.0          | 0.0           | 0.0          |

Analyze key metrics for your accounts and instruments in real-time, historically, and in Replay mode:

Evaluate your strategy's strengths and weaknesses using detailed profit and loss indicators, drawdowns, recovery metrics, and commissions;

Track time, volume, and profit from your independently opening and closing trades across all accounts, instruments, and platforms using the trading journal;

Analyze direction, volume, price, and other parameters for orders and positions;

Visualize performance through equity charts;

Add comments with your own hypotheses and conclusions.

9 Online Statistics for ATAS SIM

---

ATAS develops market analytics software that helps traders see market structure in detail. The company does not provide investment services and does not operate as a broker or exchange. Trading involves a risk of loss. See [Disclaimer](#)
